

SmartNav Crane Edition

SmartNav At A Glance

- **IAP CRANE ROUTES**
Assist your drivers in maintaining compliance under IAP by navigating the drivers according to their permits.
- **RE-USE ITINERARIES**
Save common itineraries to be re-used at a later date minimising driver interaction and maximising accuracy.
- **UPDATE 'OVER THE AIR'**
Important route details can be added 'over the air' rather than force drivers to return to base to update data.
- **USER FRIENDLY – iFACE GEN2**
SmartNav uses Transtech's iFace Gen2 which is a 7-inch touchscreen designed for simple operation by drivers and staff.
- **PLAN FOR THE FUTURE**
SmartNav runs on Transtech's iFace Gen2 touchscreen. New applications are being continuously developed for the iFace platform including Fatigue Management (Electronic Work Diary), electronic permits/documentation and more.

Compliance Services For Crane Operators for IAP

SmartNav from Transtech provides a powerful navigation tool to assist drivers in maintaining compliance under their relevant state based permits for cranes.

SmartNav uses Transtech's iFace Gen2 in-cab touchscreen to provide turn by turn navigation for drivers, routing vehicles away from roads excluded under their permit.

Navigating to an address will ensure excluded roads under the program are not included in the route. Roads that are unavailable will also be displayed on the map if the user is simply in map view mode rather than routing to an address.

Key Features of SmartNav:

- Supports NSW Level 1 – 4 cranes
- NSW level 4 crane (12 tonne axle)
- Save and re-use itineraries
- Over the air updates of new road restrictions
- Touchscreen operation via iFace Gen2
- Full turn by turn navigation for drivers

Requirements:

- Transtech iFace Gen2
- Transtech SmartNav software module
- Enrolment in the IAP
- Relevant permits for NSW
